

2026 Summer Seminar Pictorial Report – Part Two

By Craig Eberhart, LSCC #1348

Editor's Note: Craig Eberhart rounds out Len's excellent photo-based coverage of the LSCC Summer Seminar Class presented in Colorado Springs, with his own unique perspective of the week's events.

Cameron Scheirer, one of two Young Numismatists (YNs) in the course, is examining a partially melted stack of coins recovered from the San Francisco Mint after the 1906 earthquake and subsequent fire. Interestingly, the stack of melded coins included at least one New Orleans coin, a Morgan dollar.

Louise Boling and Paul Hartman are examining a roll of 1888-O Morgan dollars in a Capital Plastics coin holder, nineteen of which have a rotated reverse!

The last photo shows six of our eight class participants attributing 1840-O half dollars by Wiley-Bugert numbers. Our other YN, Gage Chaffee, is the fourth person from the left. Both YNs are new LSCC members!
